DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 41-54 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 41 does not positively recite that the toner of Claim 1 must be present in the fixing device. The language "for fixing" is deemed by the Examiner as intended use and it is suggested that the fixing device include the toner with the language "which comprises".

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-54 are rejected under 35 U.S.C. 103(a) as being unpatentable over each of Wilson (5,147,747), Matsubara (4,940,644), and O'Malley (3,967,962). Wilson (col. 1 line 64 and col. 5), Matsubara (col. 3-4), and O'Malley (claim 9 and col. 4-5) each teach block polyester resins for toners and related improved fixing applications. Wilson, Matsubara, and O'Malley each teach adjustability dependant on the crystalline and amorphous portion of the block polymers and it would have been obvious to one of ordinary skill in the art to use art recognized variants of the block polyester resin in well

known toner applications because of the direct suggestion of each of Wilson, Matsubara, and O'Malley and the expectation of similar results due to the known effect of polyester resins used in similar toners.

Double Patenting

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claims 1-54 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-65 and 1-61 of copending Application No. 10/687,968 and 10/687,929, respectively. Although the conflicting claims are not identical, they are not patentably distinct from each other because similar block polyesters are used for the same toner applications.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
